

**WireIE**  
Wireless Net Everywhere.com

# EXPERTISE IN NEXT GENERATION NETWORKS

Discover what sets us apart.  
[wireie.com](http://wireie.com)

# What we do

## The result of focused expertise

We use our in-depth knowledge and unique expertise to plan, design, build, maintain and support network transformations and network extensions.

We take legacy mobile networks, fixed networks, utility and municipal networks and transform them into Next Generation IP networks:

- Core network, backhaul and radio access
- Eco-friendly and carbon offsetting solutions
- Legacy Technology Retirement solutions
- Vendor and technology agnostic

**Our forte:** Electrical utility sector, emerging telcos in the Caribbean, Latin America, Africa, and Tier 1 Canadian and U.S. telcos.

Our complete and customized solutions run the gamut from large urban, regional and national private and public networks. Our Canadian and International clients include Tier 1 and Tier 2 network operators, municipalities, and energy and utility sectors.

# What we are

## A centre of excellence

WireE is a select group of dedicated specialists with decades of collective proven expertise in state-of-the-art wireless network design, engineering and network transformation. This expertise is supported by an unwavering adherence to the most rigorous project management principles in the industry.

We are global leaders, yet proudly Canadian, with offices in Canada and Barbados.

# Why WireE

## The WireE edge

WireE is a new breed of company. We are exceedingly well-versed in Next Generation Network creation, transformation, build and optimization. WireE also offers a unique approach to financing solutions. It is our mindset, capabilities and refreshing client-focused approach that sets us apart from more traditional companies.

### We're listeners.

It all starts with you. We work with your team to understand your issues, challenges and opportunities. We then go to work on developing the appropriate innovative solution based on our whole product value-added solutions. We guarantee your build through turnkey end-to-end delivery, including value-added service, operational support system integration, financing and capital management, as well as in-service support.

### We're different.

WireE is a team of smart, creative, innovative and respected experts. We have proven ourselves in our respective disciplines, and together, we apply our excellence in a focused, rigorous manner.

### We're green.

Our foundations for intelligent energy enable smart grid and harness alternative sources of renewable energy such as wind and solar power. This helps lower carbon emissions, improve disaster preparedness, and meet corporate sustainability objectives. This translates into considerable savings over the long run. WireE itself is a carbon-neutral company through the purchase of carbon offsets.

### We're with you all the way.

Our services cover the entire life cycle of a network, from site acquisition through design, engineering, installation configuration and financing. Post-launch, we stay involved, through ongoing support, optimization and monitoring.

### We're vendor agnostic.

We are not bound to any particular vendors, we simply go with excellence. We assess unique needs, then select the best technology from the best vendors for the best solution.

# What we can do for you

## Tell us what we can do for you

We have the expertise to identify and understand unique challenges. We have the knowledge, experience and resources to create, build, deploy and maintain the latest in network solutions. We are the industry's brightest and best with proven experience in the areas necessary to ensure success in your Next Generation Network solution.

Let's start the conversation.
